DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

I like rule 7.1 as it makes readability easier and will also increase the speed at which you can document your code.

I really like 13.6 as they are correct. Having a more expressive incrementation will make the code far nicer to read and understand. Not having to switch our brain to computer speak means there is less time needed to get into the actual programming.

14.5 is also the greatest rule as it ensures that a person knows what building blocks they are going to use before they build something in the same way it is better to know what pieces of code we have at our disposal before we go about modifying or adding other pieces of code and potentially duplicating work.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

In rule 6.1 they encourage us not to use template literals however in general using them regardless of the string type you ensure that later modification is easy.

I do not understand 10.10 as I thought specifying the exact location of the thing you are referencing means there will be no mixup if another file gets added matching the same criteria.

I don't like rule 16.3 as i would rather have a complete else if scope to understand the process of elimination rather than having multiple if statements that could all be true if there is a bug.
